
Contracts for
Agentic Frameworks
Single API Method (SAM)
API Method Order (AMO)
Hybrid (H)
New Category for Agents
AES
API Element Selection
XCD
Cross-Call Value Dependency
EP
Environment Precondition
SIC
Subclass Implementation Contracts
SAM.DT (Data Type)
SAM.DT.PT
Primitive Type
SAM.DT.BIT
Built in Type
SAM.DT.RT
Reference Type
SAM.DT.MT
ML Type
AMO.G
Always
AMO.F
Eventually
H.SL Selection
H.SL.MIXED
SAM and AMO Alternatives
H.SL.SAM
SAM Alternatives
H.SL.AMO
AMO Alternatives
H.SAI
SAM-AMO
Interdependency
SAM.BET
Boolean Expression Type
SAM. BET.IC1
Intra Argument Contract
SAM.BET.IC2
Inter Argument Contract
New Category for Agents
SAM.RV
Return Value Contract
SAM.PS
Parameter Signatue Contract
SAM.SE
State and Side-Effect Postconditon
Definition
SAM
Behavioral preconditions or postconditions of a single API method
AMO
Temporal constraints governing API-call ordering
H
Behavior–order dependencies or alternative contract forms
